**Tamil Nadu Skill Development Corporation (TNSDC)**
**Niral Thiruvizha 3.0 (2025 - 2026)**
**Regional Review - Madurai (6th August, 2026)**

| S.NO | NMNT ID | Region | College | Review Date | Session | Panel | Team Name | Problem Statement | Theme |
|---|---|---|---|---|---|---|---|---|---|
| 1 | NMNTSTD91290034 | Madurai | ULTRA College of Engineering& Technology | 06/08/2026 | FN | 1 | SafePass Engineers | How might we develop an efficient system to monitor and assess road quality in real-time, using technology to detect issues like potholes, cracks, and wear to improve maintenance and safety? | Artificial Intelligence |
| 2 | NMNTSTD91290013 | Madurai | ULTRA College of Engineering& Technology | 06/08/2026 | FN | 1 | Road Vision | How might we develop an efficient system to monitor and assess road quality in real-time, using technology to detect issues like potholes, cracks, and wear to improve maintenance and safety? | Artificial Intelligence |
| 3 | NMNTSTD91770132 | Madurai | Thiagarajar College of Engineering, Madurai | 06/08/2026 | FN | 1 | Dream Catchers | How might we develop an effective and sustainable solution to control the spread and presence of Mucuna bracteata within forest environments, protecting native species and preserving biodiversity? | Climate Change/ Disaster management |
| 4 | NMNTSTD91770178 | Madurai | Thiagarajar College of Engineering, Madurai | 06/08/2026 | FN | 1 | Regen Realm | How might we develop an innovative and cost-effective solution to enhance the efficiency of solar panels by optimizing energy absorption, reducing losses, and improving performance in varying environmental conditions? | Clean, Green & Renewable Energy |
| 5 | NMNTSTD91770124 | Madurai | Thiagarajar College of Engineering, Madurai | 06/08/2026 | FN | 1 | Innovatron | How can we design an economical device, such as robotic boats, to efficiently collect plastic waste in marine ecosystems and integrate anti-pollutant technologies to protect and sustain the marine environment? | Robotics/ Drone/ Industry 4.0 |
| 6 | NMNTSTD91230025 | Madurai | SACS M.A.V.M.M ENGINEERING COLLEGE | 06/08/2026 | FN | 1 | PROBLEM SOLVERS | How might we create a skill/job recommender application using suitable technology, transforming career guidance by leveraging technology to match individuals with suitable jobs, fostering efficient employment and career development? | Smart Education/ Edu-Tech/ Skill Development |
| 7 | NMNTSTD91230004 | Madurai | SACS M.A.V.M.M ENGINEERING COLLEGE | 06/08/2026 | FN | 1 | AquaSentinel | How might we develop a cost-effective and innovative solution to predict, monitor, and mitigate flooding risks in vulnerable coastal and urban regions using data-driven and technology-enabled approaches? | Climate Change/ Disaster management |
| 8 | NMNTSTD92380001 | Madurai | MANGAYARKARASI COLLEGE OF ENGINEERING | 06/08/2026 | FN | 1 | Innovators | How might we develop an innovative and cost-effective solution to enhance the efficiency of solar panels by optimizing energy absorption, reducing losses, and improving performance in varying environmental conditions? | Clean, Green & Renewable Energy |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 9 | NMNTSTD92380003 | Madurai | MANGAYARKARASI COLLEGE OF ENGINEERING | 06/08/2026 | FN | 1 | Nerual Nexus | How can we design an economical device, such as robotic boats, to efficiently collect plastic waste in marine ecosystems and integrate anti-pollutant technologies to protect and sustain the marine environment? | Robotics/ Drone/ Industry 4.0 |
| 10 | NMNTSTD92380030 | Madurai | MANGAYARKARASI COLLEGE OF ENGINEERING | 06/08/2026 | FN | 2 | EyeQ Engineers | How can we design an economical device, such as robotic boats, to efficiently collect plastic waste in marine ecosystems and integrate anti-pollutant technologies to protect and sustain the marine environment? | Robotics/ Drone/ Industry 4.0 |
| 11 | NMNTSTD92380016 | Madurai | MANGAYARKARASI COLLEGE OF ENGINEERING | 06/08/2026 | FN | 2 | PaveNova | How might we develop an efficient system to monitor and assess road quality in real-time, using technology to detect issues like potholes, cracks, and wear to improve maintenance and safety? | Artificial Intelligence |
| 12 | NMNTSTD91110003 | Madurai | SRM Madurai College for Engineering and Technology | 06/08/2026 | FN | 2 | LegionX | How might we utilize AI chatbots and machine learning to address the challenges of incomplete alleviation of depression symptoms, attrition, and loss of follow-up in mental health treatment | Artificial Intelligence |
| 13 | NMNTSTD91110299 | Madurai | SRM Madurai College for Engineering and Technology | 06/08/2026 | FN | 2 | Team Targaryen Tech | How can we design an economical device, such as robotic boats, to efficiently collect plastic waste in marine ecosystems and integrate anti-pollutant technologies to protect and sustain the marine environment? | Robotics/ Drone/ Industry 4.0 |
| 14 | NMNTSTD91110175 | Madurai | SRM Madurai College for Engineering and Technology | 06/08/2026 | FN | 2 | AGRO | How might we design an AI driven app incorporating climate modelling, disease management, soil testing, market forecasting which will provide farmers with valuable inputs, guidance on crop management, sustainable agricultural practices. irrigation strategies, use of agricultural inputs and choice of crops? | Agriculture/ Food Tech |
| 15 | NMNTSTD91110150 | Madurai | SRM Madurai College for Engineering and Technology | 06/08/2026 | FN | 2 | Stacked | How might we design an IoT-based self-sustained autonomous solution for the maintenance of public toilets? This system would use sensors for automatic cleaning, odor control, and tracking daily usage to ensure cleanliness and efficient management, improving hygiene and reducing manual intervention. | Artificial Intelligence |
| 16 | NMNTSTD91110180 | Madurai | SRM Madurai College for Engineering and Technology | 06/08/2026 | FN | 2 | QuadraTech Queens | How might we design an IoT-based self-sustained autonomous solution for the maintenance of public toilets? This system would use sensors for automatic cleaning, odor control, and tracking daily usage to ensure cleanliness and efficient management, improving hygiene and reducing manual intervention. | Artificial Intelligence |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 17 | NMNTSTD91200068 | Madurai | PANDIAN SARASWATHI YADAV ENGINEERING COLLEGE | 06/08/2026 | FN | 2 | ELITE FIGHTERS | How might we design compact, cost effective, non polluting environment-friendly waste management systems thereby overcoming shortage of suitable land and addressing chronic waste management issues in densely populated areas? | Solid Waste/ Bio-waste/ E-waste |
| 18 | NMNTSTD91200010 | Madurai | PANDIAN SARASWATHI YADAV ENGINEERING COLLEGE | 06/08/2026 | FN | 2 | PHOENIX | Design a smart waste collection system that allows citizens to segregate the various types of solid waste they want to dispose and the municipal authorities to efficiently collect the same. The system should be mobile app (Android) based. | Solid Waste/ Bio-waste/ E-waste |
| 19 | NMNTSTD91060117 | Madurai | KLN College of engineering | 06/08/2026 | FN | 3 | AMUSED TITANS | How can we develop an AI-driven technology to monitor and detect drainage channel blockages, automatically clearing and rectifying these blockages during the rainy season to prevent water inundation? | Agriculture/ Food Tech |
| 20 | NMNTSTD91060111 | Madurai | KLN College of engineering | 06/08/2026 | FN | 3 | EcoFusion | How might we design a cost-effective home composting solution for daily kitchen waste, ensuring quick and odor-free decomposition? | Clean, Green & Renewable Energy |
| 21 | NMNTSTD92330054 | Madurai | GOVERNMENT COLLEGE OF ENGINEERING, Theni | 06/08/2026 | FN | 3 | DIRECTING SUCCESS | How can we design an economical device, such as robotic boats, to efficiently collect plastic waste in marine ecosystems and integrate anti-pollutant technologies to protect and sustain the marine environment? | Robotics/ Drone/ Industry 4.0 |
| 22 | NMNTSTD92330001 | Madurai | GOVERNMENT COLLEGE OF ENGINEERING, Theni | 06/08/2026 | FN | 3 | ECONOVA | Design a home level cost effective safety technology to dispose Solid waste and e- waste by without affecting environment. | Solid Waste/ Bio-waste/ E-waste |
| 23 | NMNTSTD92330004 | Madurai | GOVERNMENT COLLEGE OF ENGINEERING, Theni | 06/08/2026 | FN | 3 | Pixel Pirates | How might we develop an innovative and cost-effective solution to enhance the efficiency of solar panels by optimizing energy absorption, reducing losses, and improving performance in varying environmental conditions? | Clean, Green & Renewable Energy |
| 24 | NMNTSTD92330006 | Madurai | GOVERNMENT COLLEGE OF ENGINEERING, Theni | 06/08/2026 | FN | 3 | QuadCore | How might an innovative solution address communication challenges in remote areas, such as hilly and forest regions with weak or no network coverage? The goal is to develop an affordable and accessible emergency communication system, considering that satellite phones are financiallyunfeasible for most of the population. | Information/ Communication Technology |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 25 | NMNTSTD92170370 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | FN | 3 | The Determinators | How might an innovative solution address communication challenges in remote areas, such as hilly and forest regions with weak or no network coverage? The goal is to develop an affordable and accessible emergency communication system, considering that satellite phones are financiallyunfeasible for most of the population. | Information/ Communication Technology |
| 26 | NMNTSTD92170217 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | FN | 3 | Ecofusion Innovators | How might we design compact, cost effective, non polluting environment-friendly waste management systems thereby overcoming shortage of suitable land and addressing chronic waste management issues in densely populated areas? | Solid Waste/ Bio-waste/ E-waste |
| 27 | NMNTSTD92170028 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | FN | 3 | Apex | How might we utilize AI chatbots and machine learning to address the challenges of incomplete alleviation of depression symptoms, attrition, and loss of follow-up in mental health treatment | Artificial Intelligence |
| 28 | NMNTSTD92170013 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 1 | MasterMinds | Design a smart waste collection system that allows citizens to segregate the various types of solid waste they want to dispose and the municipal authorities to efficiently collect the same. The system should be mobile app (Android) based. | Solid Waste/ Bio-waste/ E-waste |
| 29 | NMNTSTD92170192 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 1 | Agri Tech | Develop innovative technologies that enhance crop traits such as flood tolerance, pest and disease resistance and increased nutrient content without altering plant genes which should reduce reliance on chemical inputs and preserve natural biodiversity | Agriculture/ Food Tech |
| 30 | NMNTSTD92170031 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 1 | Scrapers | How might we develop a centralized digital platform to connect all PHCs, Upgraded PHCs, and Sub-Centres with the Deputy Director of Health Services (DDHS), enabling real-time monitoring of doctor attendance, healthcare services, and automated absenteeism alerts to improve healthcare delivery across divisions? | Med Tech/ Bio Tech/ Health Tech |
| 31 | NMNTSTD92170065 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 1 | UNIQUE | Design and develop an innovative solution that utilizes technology to improve farming practices, increase crop yields,and reduce waste.The solution should be scalable, sustainable,and accessible to smallholder farmers. | Agriculture/ Food Tech |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 32 | NMNTSTD92170096 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 1 | Tech Trackerz | Develop a GPS - enabled tracking and monitoring system for vehicles transporting earth excavated under permitted conditions. The System should ensure real - time tracking of trips, verify compliance with excavation limits and prevent illegal mining activities by detecting unauthorized or repeated trips. | Transportation/ Logistics/ Smart Vehicles |
| 33 | NMNTSTD92170140 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 1 | TINI CODERS | How might we develop a centralized digital platform to connect all PHCs, Upgraded PHCs, and Sub-Centres with the Deputy Director of Health Services (DDHS), enabling real-time monitoring of doctor attendance, healthcare services, and automated absenteeism alerts to improve healthcare delivery across divisions? | Med Tech/ Bio Tech/ Health Tech |
| 34 | NMNTSTD92170162 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 1 | Tech sparkles | How can we design an image processing algorithm for portable X-ray devices to reduce noise, enhance contrast, and sharpen images without altering critical diagnostic details? This includes considering hardware limitations, ensuring computational efficiency, and validating with diverse datasets for accurate clinical application. | Med Tech/ Bio Tech/ Health Tech |
| 35 | NMNTSTD92170212 | Madurai | SETHU INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 1 | Dynamic Dreamers | How might we utilize AI chatbots and machine learning to address the challenges of incomplete alleviation of depression symptoms, attrition, and loss of follow-up in mental health treatment | Artificial Intelligence |
| 36 | NMNTSTD95190124 | Madurai | P.S.R. ENGINEERING COLLEGE | 06/08/2026 | AN | 1 | team five | How can we design an economical device, such as robotic boats, to efficiently collect plastic waste in marine ecosystems and integrate anti-pollutant technologies to protect and sustain the marine environment? | Robotics/ Drone/ Industry 4.0 |
| 37 | NMNTSTD95190094 | Madurai | P.S.R. ENGINEERING COLLEGE | 06/08/2026 | AN | 2 | Byte Force | How might we utilize AI chatbots and machine learning to address the challenges of incomplete alleviation of depression symptoms, attrition, and loss of follow-up in mental health treatment | Artificial Intelligence |
| 38 | NMNTSTD95190575 | Madurai | P.S.R. ENGINEERING COLLEGE | 06/08/2026 | AN | 2 | AI Innovators | How might we utilize AI chatbots and machine learning to address the challenges of incomplete alleviation of depression symptoms, attrition, and loss of follow-up in mental health treatment | Artificial Intelligence |
| 39 | NMNTSTD95190095 | Madurai | P.S.R. ENGINEERING COLLEGE | 06/08/2026 | AN | 2 | SPS SQUAD | Develop a suitable technology to provide prior intimation to people that natural calamities like Tsunami, Heavy rainfall, cyclones, land slides, etcâ€¦, going to occur. | Climate Change/ Disaster management |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 40 | NMNTSTD95360214 | Madurai | RAMCO INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 2 | Tech Tornado | How to provide smart education to the poor (below poverty line) students inorder to improve their skills (Abacus/ Communication Skills, etc) based on their students interest during Saturday, Sunday and Holidays. | Smart Education/ Edu-Tech/ Skill Development |
| 41 | NMNTSTD95360205 | Madurai | RAMCO INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 2 | Eden | Develop a suitable technology to provide prior intimation to people that natural calamities like Tsunami, Heavy rainfall, cyclones, land slides, etcâ€¦ going to occur. | Climate Change/ Disaster management |
| 42 | NMNTSTD95360059 | Madurai | RAMCO INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 2 | PHOENIX | How might we develop a centralized digital platform to connect all PHCs, Upgraded PHCs, and Sub-Centres with the Deputy Director of Health Services (DDHS), enabling real-time monitoring of doctor attendance, healthcare services, and automated absenteeism alerts to improve healthcare delivery across divisions? | Med Tech/ Bio Tech/ Health Tech |
| 43 | NMNTSTD95360006 | Madurai | RAMCO INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 2 | FlowForge Techies | How might we develop an automated water distribution system that ensures 55 LPCD per person, prevents wastage, and reduces electricity usage in rural households? | Rural & Urban development / Manufacturing/ Engineering Technology |
| 44 | NMNTSTD95360187 | Madurai | RAMCO INSTITUTE OF TECHNOLOGY | 06/08/2026 | AN | 2 | Tensor minds | How might we create a centralized Learning Management System that integrates user logins, course enrollment, attendance, assessments, and certifications into a seamless and intuitive dashboard? | Information/ Communication Technology |
| 45 | NMNTSTD92040007 | Madurai | Kamaraj College of Engineering and Technology | 06/08/2026 | AN | 2 | ECOSYNTH | How might we develop an innovative, cost-effective, user-friendly, and sustainable solution to control the rapid spread of water hyacinth in aquatic ecosystems, while converting its biomass into economically and environmentally beneficial products? | Agriculture/ Food Tech |
| 46 | NMNTSTD92040243 | Madurai | Kamaraj College of Engineering and Technology | 06/08/2026 | AN | 3 | WebyFreaks | How might we develop a blockchain-based application to identify and counter fake social media profiles? Tailored for investigative agencies and law enforcement, enhancing profile authenticity and security. | Information/ Communication Technology |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 47 | NMNTSTD92040119 | Madurai | Kamaraj College of Engineering and Technology | 06/08/2026 | AN | 3 | Team Techno | How might we develop an innovative and cost-effective solution to enhance the efficiency of solar panels by optimizing energy absorption, reducing losses, and improving performance in varying environmental conditions? | Clean, Green & Renewable Energy |
| 48 | NMNTSTD92040286 | Madurai | Kamaraj College of Engineering and Technology | 06/08/2026 | AN | 3 | Powerhou se | How might we develop sound, cost effective storage and warehousing solutions for storing farm produce which can be easily accessed by poorer farmers and can be scaled up to mass production? | Agriculture/ Food Tech |
| 49 | NMNTSTD92040099 | Madurai | Kamaraj College of Engineering and Technology | 06/08/2026 | AN | 3 | Suraksha Kantak | How might we design an extendable, adjustable-hand fork for sanitation workers (Thooimai Paniyalargal) in rural areas, allowing them to safely and efficiently separate plastic waste from organic waste while minimizing direct contact and improving safety and comfort? | Solid Waste/ Bio-waste/ E-waste |
| 50 | NMNTSTD95170415 | Madurai | Mepco Schlenk Engineering College, Sivakasi | 06/08/2026 | AN | 3 | Resilien Bio | How might we develop an effective and sustainable solution to control the spread and presence of Mucuna bracteata within forest environments, protecting native species and preserving biodiversity? | Climate Change/ Disaster management |
| 51 | NMNTSTD95170511 | Madurai | Mepco Schlenk Engineering College, Sivakasi | 06/08/2026 | AN | 3 | Triad | How might we design an AI driven app incorporating climate modelling, disease management, soil testing, market forecasting which will provide farmers with valuable inputs, guidance on crop management, sustainable agricultural practices. irrigation strategies, use of agricultural inputs and choice of crops? | Agriculture/ Food Tech |
| 52 | NMNTSTD91000004 | Madurai | Anna University Regional Campus Madurai | 06/08/2026 | AN | 3 | ROADSTE RS | Develop a GPS - enabled tracking and monitoring system for vehicles transporting earth excavated under permitted conditions. The System should ensure real - time tracking of trips, verify compliance with excavation limits and prevent illegal mining activities by detecting unauthorized or repeated trips. | Transportatio n/ Logistics/ Smart Vehicles |
| 53 | NMNTSTD91760060 | Madurai | Alagappa Chettiar Government College of Engineering and Technology | 06/08/2026 | AN | 3 | ACboyz | How might we design a cost-effective home composting solution for daily kitchen waste, ensuring quick and odor-free decomposition? | Clean, Green & Renewable Energy |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 54 | NMNTSTD91760013 | Madurai | Alagappa Chettiar Government College of Engineering and Technology | 06/08/2026 | AN | 3 | TriSpark | How might we develop a smart, economical solution to digitize and monitor the growth measurements (height and weight) of children, track attendance without overburdening server space, and improve ICDS enrollment by attracting public engagement in Anganwadi services? | Information/ Communication Technology |
