PREPARED SPEECH – 1

TITLE:

Envision. Create. Achieve.

INTRODUCTION:

Hey everyone! I'm **Abdur Rahman**, and I'm excited to be here today.

I'm currently in my **third year of Computer Science Engineering** at Sethu Institute of Technology, specializing in **Artificial Intelligence and Machine Learning**.

Technology has always fascinated me, especially how it can be used to solve real-world problems. This passion led me to explore various fields like **AI, IoT, and Robotics** Over time, I've worked on several projects and enjoy continuously learning new things to enhance my skills.

BODY:

1. My Projects and Experience

I have done several projects in **IoT**.

In **hardware**, I have worked on:

- **AI assistance for blind people** – A project that helps **P W D** people especially for blinds to overcome their Daily life challenges
- **Autonomous Fire-fighting BOT**– A BOT is designed to helps in Rescuing operations for major fire accident

2. My Passion for Robotics

Apart from AI and IoT, my biggest passion lies in robotics. Right from my school days, I was fascinated by how machines could be programmed to think and act. This curiosity pushed me to learn about robotics, automation, and embedded systems.

One of my biggest achievements in robotics was successfully building an autonomous fire-fighting robot. This project combined multiple technologies, including AI, IoT, and embedded systems, to create a robot capable of detecting and extinguishing fires without human intervention. The success of this project gave me the confidence to push my limits and explore even more advanced innovations in robotics.

3. **My Strengths and Values**

One of my biggest strengths is **my problem-solving ability**. I enjoy taking on challenges and finding creative solutions using technology. I also believe in **Effort, Commitment, and Lifelong Learning** .

I am someone who is always ready to explore new opportunities, work with a team, and contribute to meaningful projects. I strongly believe that technology should be used for the betterment of society, and I strive to build applications that make a positive impact.

4. My Future Goals and Vision

In the future, I see myself working under **Elon Musk** on groundbreaking **SpaceX** projects. Contributing to space technology has always been a dream of mine, and I am constantly striving to improve my skills to make this a reality.
My vision is to push the boundaries of AI and robotics to develop innovative solutions that can be used in space exploration, automation, and beyond. I aim to be part of projects that make a real impact on humanity's future.

CONCLUSION:

Technology is shaping the future, and I am determined to be at the forefront of this transformation.

From robotics to AI and space technology, I want to contribute to groundbreaking innovations that push human potential further with a mindset of continuous learning and problem-solving, I am ready to take on new challenges and work on projects that make a lasting impact on the world.

THANK YOU

PREPARED SPEECH – 2

TITLE:

THE STRENGTH OF PERSEVERANCE

INTRODUCTION:

Life is full of challenges. Sometimes, things don't go as planned, and we feel like giving up. But success comes to those who keep trying and never lose hope.

One great example of this is Elon Musk—an entrepreneur who faced countless failures but never gave up. His story teaches us that hard work, resilience, and determination can turn even the biggest dreams into reality.

BODY:

Elon Musk's Journey: From Failures to Success

Elon Musk did not become **a billionaire overnight**. His journey was filled with struggles, failures, and setbacks.

In the early days, he co-founded **Zip2**, but it faced challenges before becoming successful. Later**, he started X.com,** which later became **PayPal**, but he was removed as CEO from his own company. Despite this, he kept going and focused on even bigger dreams.

When he started SpaceX, his goal was to make space travel affordable. But the first three rocket launches failed, **almost bankrupting the company**. People called him crazy and doubted his vision. However, he refused to give up. On the fourth attempt**, SpaceX finally succeeded**, saving the company and proving that persistence pays off.

Today**, Elon Musk is the CEO** of multiple world-changing companies like **Tesla, SpaceX, Neural link** and The Boring Company all because he never gave up.

What We Can Learn from Him

Elon Musk's story is not just about business—it teaches us important lessons about Life**:**

- **Hard Work Pays Off** – Success doesn't happen overnight. If you keep working hard, you will eventually see results.
- **Believe in Yourself** – Even when others doubt you, trust your vision and keep pushing forward.
- **Turn Failure into Motivation** – Failing is not the end. Instead, learn from mistakes, improve, and try again.

The Mindset of a Visionary

What makes Elon Musk different from others?

It is his mindset. He dreams big, believes in his ideas, and never lets failures stop him. He keeps working hard and pushing boundaries every single day.

One of his famous quotes is:
"When something is important enough, you do it even if the odds are not in your favour"

This mindset is important for all of us. No matter what we do—studies, business, or personal goals—we must stay positive, keep learning, and never give up.

Why We Should Never Give Up

Everyone faces problems in life whether in studies, career, or personal challenges. But giving up is never the solution. Success takes time, patience, and effort. If we keep going, we will achieve our goals.

Elon Musk didn't stop when things got tough he pushed harder. If we do the same, we can also achieve great things in life.

CONCLUSION:

Life is not easy, but winners never quit. No matter how difficult things get, keep trying, keep believing, and keep moving forward. Hard work and dedication will lead you to success.

So, whenever you feel like quitting, remember Elon Musk's journey if he can do it, so can we!

THANK YOU

SPEECH EVALUATION SHEET - 1

EVALUATION FORM

Title _____

Evaluator _____

Date _____

Note to the Evaluator:

In this speech the speaker is to present a speech that is organized in a manner which includes an opening, a body and a conclusion (OBC). The speech must have a general purpose and a specific purpose.
In addition to your verbal evaluation, please write answers to the questions below.
What strong points does the speaker have?

Level of Preparation	: Very Good/ Good/ Satisfactory
Audibility and Clarity of the speech	: Very Good/ Good/ Satisfactory
Speech Organization (OBC)	: Very Good/ Good/ Satisfactory
Transitions	: Very Good/ Good/ Satisfactory
Clarity of the general purpose of the speech	: Very Good/ Good/ Satisfactory
Clarity of the specific purpose of the speech	: Very Good/ Good/ Satisfactory

What did you like about the presentation?

QUALITY CIRCLE PROJECT

TEAM NAME : VORTEX

WHY THIS NAME:

Our team name, "Vortex," represents energy, movement, and transformation. A vortex is a powerful force that pulls things together and creates change, just like our team aims to bring students, faculty, and environmental initiatives together for impactful waste management. It symbolizes innovation, teamwork, and continuous progress toward a cleaner and more sustainable future.

TEAM MEMBERS:

1. ABDUR RAHMAN M (921722116003)
2. VIGNESHWARAN B (921722116055)
3. JAYA BALAJI P R (921722116025)
4. MOHAMED MAFAZ S (921722116031)

I. INTRODUCTION:

Waste mismanagement in our college arises due to a single dustbin in each department, leading to the mixing of biodegradable and non-biodegradable waste. This not only causes pollution but also makes recycling and proper disposal difficult. Without segregation, valuable biodegradable waste goes to waste instead of being repurposed for environmental benefits.

To solve this, we propose placing separate bins for biodegradable and non-biodegradable waste, along with awareness banners across the campus. The biodegradable waste will be converted into fertilizer for use in the agricultural department, promoting sustainability and responsible waste management while ensuring a cleaner and greener campus.

II. Why We Chose It

In our college, each department currently has only a single dustbin, leading to improper waste disposal. The lack of waste segregation results in environmental hazards and inefficiencies in waste management. By introducing separate biodegradable and non-biodegradable waste bins, we aim to promote sustainability, reduce waste pollution, and encourage responsible waste disposal. Additionally, utilizing biodegradable waste as fertilizer can benefit the agricultural department, fostering a green campus initiative.

III. Tools and Techniques Used

- Separate Dustbins: One for biodegradable waste and another for non-biodegradable waste.
- Awareness Banners: Informational posters placed around the campus to educate students on waste segregation.
- Fertilizer Production: Using biodegradable waste for composting to support the agricultural department.
- Surveillance & Monitoring: Regular checks and student involvement to ensure effective implementation.

IV. Implementation Steps

A. Planning and Strategy

1. Conduct research on the best waste segregation practices.
2. Identify suitable locations for placing dustbins.
3. Collaborate with the agricultural department for waste composting.

ACTIVITY DESCRIPTION	WEEK-1			WEEK-2			WEEK-3			WEEK-4		
	1	2	3	1	2	3	1	2	3	1	2	3
To form the team			P									
To select the burning problem					P							
To define and reason out the problem						P						
To collect the data and analyze								P				
To do the implementation steps									P			
To do the re data collection and analyze											P	
To Standardize the solutions												P

B. Execution Phase

1. Install separate dustbins across all departments.
2. Set up banners in visible locations around the campus.
3. Educate students and faculty on the importance of waste segregation through seminars or workshops.

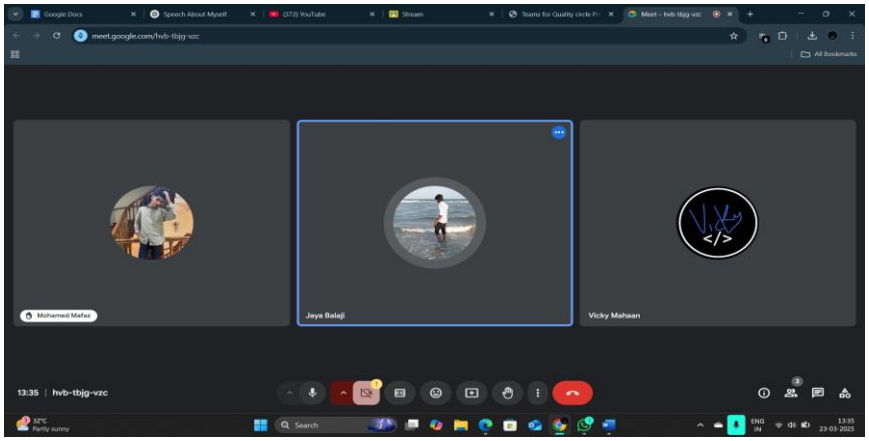

C. Monitoring and Maintenance

1. Assign volunteers or staff to monitor waste disposal practices.
2. Regularly collect biodegradable waste for composting.
3. Evaluate the effectiveness of the initiative and make necessary improvements.

D. Meetings Among Team Members

1. Discuss roles and responsibilities for executing the project.
2. Plan the awareness campaign and design banners.
3. Schedule periodic follow-ups to assess progress.

Meeting Proofs

CONCLUSION:

Implementing a waste segregation system in our college will promote environmental sustainability and responsible waste disposal. By converting biodegradable waste into fertilizer, we support agricultural initiatives within our campus.

Awareness campaigns and teamwork will ensure the success of this project, making our college a cleaner and greener place. Through continuous monitoring and student participation, we can establish a long-term waste management solution that benefits both the environment and the academic community.

"Small actions today lead to a cleaner, greener tomorrow."
